

Vitra verwendet für seine Möbel je nach angestrebten Eigenschaften verschiedene hochwertige Kunststoffe. Bei Produkten für Aussenbereiche werden spezielle Additive beigemischt, die das Ausbleichen durch UV-Bestrahlung verlangsamen. Bei Kunststoffen stellt sich immer die Frage nach ökologisch sinnvollen, neuen

Alternativen. So wurde der Panton Chair seit 1967 schon in vier verschiedenen Kunststoffen hergestellt. Am häufigsten verwendet Vitra die recycelbaren Thermoplaste Polypropylen und Polyamid.
