

.04

Maarten Van Severen, 2000

.04

.04 Counter

The .04 office chair is distinctly different in appearance from typical task chairs used in institutional office settings. Thanks to its ergonomic features, however, it remains comfortable even over long periods of sitting, and the unobtrusive design makes it a perfect choice for studios and informal office spaces.

Materials

- **Micro-mechanism:** rubber ball joint allows multi-directional movement. Height-adjustable.
- **Base:** five-star base and die-cast aluminium bridge, powder-coated. Fitted with castors or with plastic glides for carpet or felt glides for hard floors.

DIMENSIONS (in accordance with EN 1335-1:2000)
