

Marble

The marble used by Vitra is a premium quality Carrara marble. Since marble is a natural material, every marble table top has its own unique colour and texture. Vitra treats the marble surfaces with a high-quality sealer to protect them from water, oil, grease and moisture. This sealer penetrates deep into the stone, while still allowing it to breathe. Unlike the

effect of varnish sealing, the stone retains its natural appearance and particularly its colour.

Glass

Vitra currently uses so-called float glass. This is manufactured by feeding molten glass into a bath of molten tin, where it forms a floating ribbon that then cools. Special heat treatment renders the glass shock and impact resistant (single-pane safety glass according to EN 12150-1).

Painting the underside in a variety of colours, along with a satin surface finish, gives the material a fresh and unusual appearance.
