

De productie van fineerhout verloopt volgens complexe industriële methodes, waarna het materiaal nog verder met de hand wordt bewerkt. Om alle oppervlakken een uniform uitzicht te verlenen, wordt meestal hout van slechts één boom gebruikt voor een bepaald meubelstuk.

Op twee uitzonderingen na koopt Vitra uitsluitend fineer dat een duurzaamheidslabel van een Europese producent draagt. Vitra voorziet het fineer van een beschermende laklaag; de kleur zal na verloop van tijd veranderen onder invloed van het licht.
